Chapter 1

Introduction

1.1 Philosophy

This package is about how to implement rings for the GAP package homalg. To be written further.

1.2 Overview over this manual

Chapter 2 describes the installation of this package. *More text on other chapters to be written.*

Finally, Chapter 3 shows instructive examples for the usage of this package. The main reference for the Maple implementation is [BR].

Chapter 2

Installation of the RingsForHomalg-Package

To install this package just extract the package's archive file to the GAP `pkg` directory.

By default the RingsForHomalg package is not automatically loaded by GAP when it is installed. You must load the package with `LoadPackage("RingsForHomalg");` before its functions become available.

Please, send us an e-mail if you have any questions, remarks, suggestions, etc. concerning this package. Also, I would like to hear about applications of this package.

Mohamed Barakat and Simon GÃ¶rtzen

Chapter 3

Examples

Here comes text.
